

ERDAFA ANDIKRI

Jakarta, Indonesia | (+62) 821 2277 6141 | dafandikri@gmail.com | dafandikri.dev | linkedin.com/in/dafandikri | github.com/dafandikri

Professional Summary

Final-year Computer Science student at Universitas Indonesia who ships **AI** and data systems **end-to-end**, from national-scale infrastructure to live consumer products. Builds **LLM-powered agents in production**: authored the **evals** and **guardrails** behind a live bilingual AI platform, **orchestrated seven AI coding agents** into one developer-tooling CLI, and engineered the **large-scale** analytics pipeline for the **facial-recognition middleware** behind Indonesia's **e-KTP** identity system, serving **170M+ citizens**. Proven ability to ship across **production work** (100% uptime, 6 months), **hackathon wins**, and **personal builds**.

Education

Universitas Indonesia Depok, Indonesia
S.Kom, Computer Science — Final Year 2023 – Present
Relevant Coursework: Artificial Intelligence & Data Science, Databases, Statistics & Probability, Data Structures & Algorithms, Software Engineering, Operating Systems. TOEFL ITP 587; Indonesian native, English professional.

Technical Skills

Applied AI: LLM evals & **guardrails**, prompt engineering, evidence grounding, structured outputs, RAG, tool/function-calling, agentic workflows, multi-agent orchestration, MCP; Vercel AI SDK & AI Gateway, Claude Code, Codex
Data & BI: business intelligence, data pipelines, dashboard design; PostgreSQL, ClickHouse, Kafka, Debezium, Redis, Grafana, Pandas, scikit-learn
Engineering: Python, TypeScript, Java, Go, SQL, Bash; FastAPI, Django, Next.js, React, Vite; Linux, Docker, Kubernetes, IaC, Nginx, CI/CD; automated testing, Agile/Scrum. **Ways of Working:** end-to-end delivery, product ownership, analytical problem solving, cross-functional collaboration, stakeholder communication, mentoring & knowledge transfer

Experience

PT International Biometrics Indonesia Jakarta, Indonesia
Solution Engineer Intern Jun 2026 – Present

- Engineered the **end-to-end** analytics pipeline (**Debezium, Kafka, ClickHouse, Grafana**) for the national **facial-recognition middleware** behind Indonesia's **e-KTP** program — the identity backbone for **170M+ citizens** — turning live transaction data into **business intelligence** dashboards and cutting dashboard load from **ten minutes to near zero**.
- Analyzed **174,862 transactions** across a 146 MB dataset — classified **99.7%** of statuses with **zero unknowns** and certified **36 Grafana panels** with **no data errors**.
- Validated three source databases with deterministic PII masking — cleared **25/25** proof-of-concept assertions plus **9/9 Kafka** and **6/6 ClickHouse** reliability probes across schema evolution and outage replay.

Smart Invoice Reminder AI (SIRA) — NashTa Group Jakarta, Indonesia
Product & Platform Engineer — sira.nashtagroup.co.id Feb 2026 – Present

- Own production payment workflows, immutable audit history, and weighted rule-based risk scoring for a live client platform — **100% uptime** and **zero unplanned downtime** over **6 months**.
- Optimized invoice tracking from 12 queries (~217 ms) to 1 (~18 ms) — a **91.7% latency reduction** — through query profiling, SQL aggregation, RPC design, and targeted indexing.
- Delivered **46 commits** across **27 merge requests** and automated CI/CD gates — cut release cycle **70%** (45 to 13 min) and eliminated **100% of manual deployment errors** behind blue-green deploys with **rollback under 5 s**.

Kementerian Transmigrasi Republik Indonesia Jakarta, Indonesia
Intern Jul – Aug 2025

- Automated data-processing and certificate **operations** for **20+** civil servants — reduced manual processing **75%** (4 hr to 1 hr per batch), increased output **4x**, and eliminated **100% of formatting errors**; documented workflows for team handover.

PT International Biometrics Indonesia Jakarta, Indonesia
Software Developer Intern — interbio.id Jun – Aug 2024

- Rebuilt and hardened interbio.id, authored ISO 27001 compliance docs, and passed an independent penetration test with **0 critical vulnerabilities** across **47 attack vectors**; trained the comms team — **2x** output, zero incidents over **12 months**.

Additional Experience 2023 – 2026

- Backend Developer Intern, Systatum — Crystal/Marten REST APIs (2026). Software Engineer Intern, VICII — shipped a Shopify **e-commerce** storefront **cross-functionally** with IT, Design, and Marketing in a **fast-paced, dynamic** retail cycle (2025). Data Science Mentee, RISTEK Fasilkom UI — data management for **AI/ML** (2023).

Technical Projects

Talk-Active — Lead Developer, Team FAM Aug 2026

- Led a **five-person team end-to-end** and authored **143 commits** to ship a live bilingual AI rehearsal platform to production. Built **LLM evals** and **guardrails** that accept a verdict only with **verbatim transcript citations**, expose model provenance, and fall back deterministically. **Won Best Presentation against 37 teams** at RISTEK Hackathon 2026, pitching live to judges.

Model-Agnostic Agent Harness 2026

- Orchestrated **seven AI coding agents** (Claude Code, Codex, Gemini, Copilot, Qwen, OpenCode, Pi) behind one zero-dependency CLI with shared memory and safe rollback — internal developer tooling for **agentic workflows**. Hardened to **67/67 tests** and an **87.8% mutation score** across **451 mutants**.

Hermes Personal Agent Platform 2026

- Deployed a **production LLM agent** across **4 channels** (Telegram, Discord, LINE, dashboard) on a hardened self-hosted VPS — **automating manual** weekday workflows with scheduled jobs.

Solemates — Secure E-Commerce Platform on Kubernetes 2025

- Built a Django **e-commerce** platform applying **OWASP Top 10** security and a PostgreSQL schema normalized to **3NF** — passed an independent penetration test with **0 critical findings**.

dafandikri.dev — Cinematic Portfolio & Self-Managed Infrastructure 2025 – 2026

- Rebuilt and migrated a personal portfolio to a new domain with a **highly stylised, cinematic interface** (React/Vite, scroll-driven motion), **owning the user experience end-to-end**. Self-managed on **Kubernetes** with **Infrastructure as Code** and **zero-downtime** rolling deployments; **page load optimised 30%**.

Honors & Awards

Best Presentation (of 37 teams), RISTEK Hackathon — Team FAM (2026) | **Tech Wizard Award** — Universitas Indonesia (2026) | **1st Place**, Ideaton Battle T-Fest — sole winning team of 10 (2022) | **12th Place**, RISTEK Data Science — RMSE 0.638 (2023)
